## NEW 3D Full Contour ZirCrown Now Available at Kastle Mills

Full contour crowns have been appearing from various providers positioned as a replacement for full gold crowns. The full contour zirconia crowns we have seen and compared side by side that are on the market don't meet the esthetic bar that our dental laboratory customers currently demand, so we went on a search for the best 'high translucency' zirconia (it is a german zirconia) and the best shading process, implementing new refined presintered staining techniques. After a year of researching and testing various materials and shading processes, we are proud to introduce a beautiful new product for your dentist partners, the 3D ZirCrown is launched. This is a highly esthetic, 3D MultiShaded full contour zirconia crown offered at a VERY competitive price.

**Stone Models:** Kastle Mills will design the 3D ZirCrown using our gorgeous Custom 3Shape anatomical library. Alternatively, if you have 3Shape or other open scanner we can accept your design files. The 3D ZirCrown will then be created and shaded

EXHIBIT 100

(presintered) using the unique MultiShade process and technique to apply separate shades to the cervical, body, and incisal areas. You will receive the case ready to stain and glaze - no need for porcelain application. This is the most esthetic full contour zirconia we have seen throughout all of the products and processes we have evaluated over the course of the last year. The above image shows the final stained and glazed product. As a manufacturer only you will receive the unstained, unglazed 3D ZirCrown delivered to you.

We have priced these units very aggressively so you can offer a competitive and profitable restorations to your dentists.

**Our 3D ZirCrown was Approved as a Class 3 Medical Device for use in Canada - one of the very few!**

Introductory pricing for the 3D ZirCrown with MultiShade is:

**\$89.99** when we scan and design your case

**\$59.99** if you send us your digital designs.

**BENEFITS:**

Great esthetics

1100 MPa flexural strength

Great alternative to Full Gold Crowns, PFG's and pressed ceramics.

The strongest all ceramic crown available

Huge cost saving for labs and dentists.

Available in 16 Vita shades

Uses conventional cements.

More than twice the strength of e.max or any other pressed ceramics.

**Kastle Mills can help your business:**

Increase your product line with no additional investment.

Very profitable business model

Reduces labor 80 - 90%

Order the 3D ZirCrown and receive a restoration ready to stain, glaze and ship
